Skills

- **Languages:** Python, Java, C++, HTML, CSS
- Ability to problem solve and think critically
- Strong written and verbal communication skills
- Adaptability and flexibility
- Strong work ethic
- Willingness to learn

Work Experience

Campaign Canvasser

Toronto, ON

Hafeez Ladha's Liberal Candidate Campaign in Don Valley East

July 2021 – August 2021

- Went door to door/made phone calls to inform registered voters of the candidate's policy positions and to provide necessary information for them to vote on Election Day.
- Collected information about potential voters and connected them with the candidate for more information about the candidate's policy positions.
- On Election Day, made sure registered voters had voted or would vote that day.

Volunteer Experience

Tutor for Elementary School Students

November 2019 – March 2020

- Provided interactive one-on-one tutoring sessions in Mathematics to assist in the development of stronger learning techniques, while enhancing communication and active listening skills.

Extra-Curricular Activities

Technical Executive for Sir Wilfrid Laurier's Mind Over Matter

October 2019 – June 2021

- Managed the Technical Team in creating and maintaining a website for this school club, which is dedicated to raising awareness about the importance of mental health.
- Managed and organized tasks to be completed by 10+ members while encouraging the development of verbal/written communication and collaborative skills.

Projects

Tic Tac Toe Game

Python

- Developed a Tic Tac Toe game using Python, which can be played in a terminal with two players.
- Allows players to input the desired location of their player piece on to a board until a player wins or there is a tie.

Portfolio Website

HTML, CSS

- Created a website to act as a virtual portfolio for personal projects and achievements using HTML and CSS.
- Learned basic HTML and CSS through an online course to complete this project.

Education

University of Waterloo

Waterloo, ON

Candidate for a Bachelor in Applied Science in Computer Engineering

September 2021 – April 2026
